

# Rumble over the Rubble – The Hollywood “Godzilla” Version

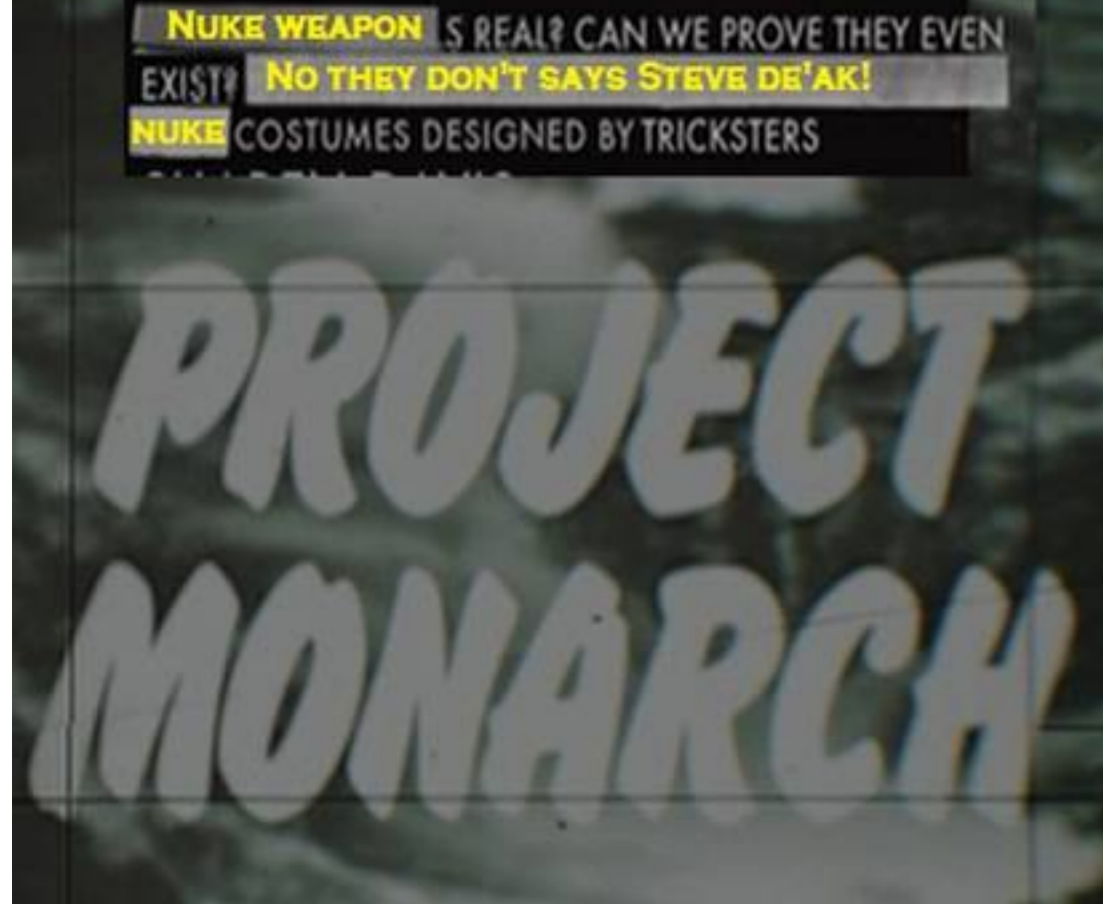

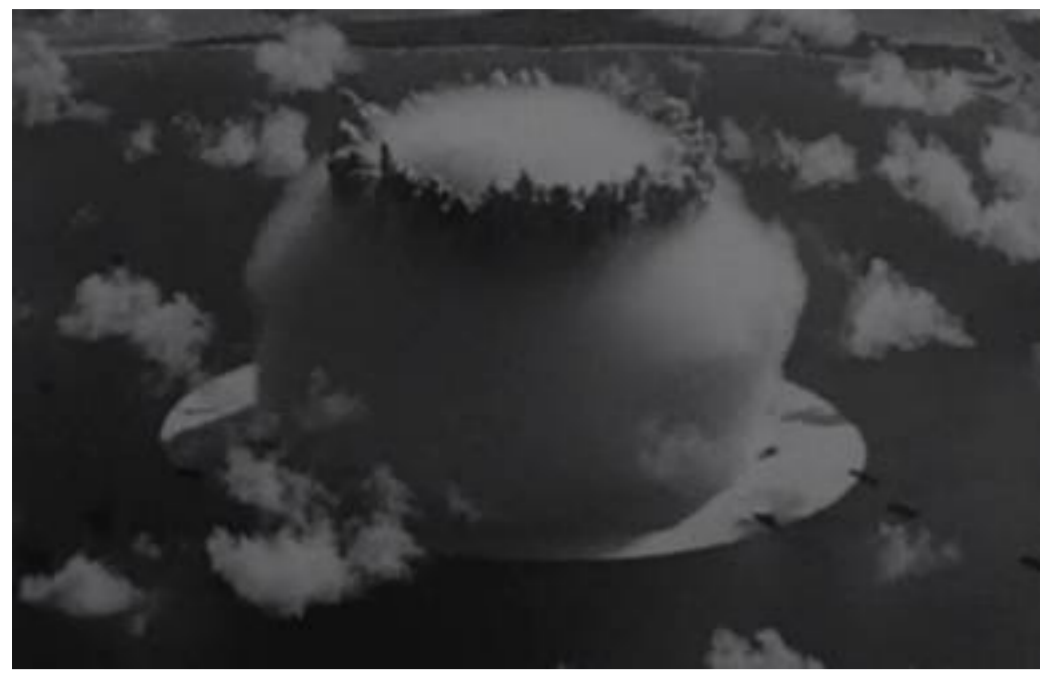

\*\*\*\*\*

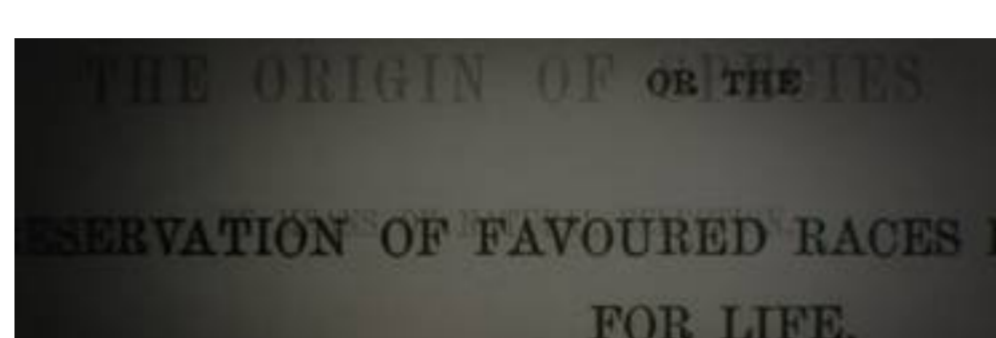

Prior to the “*Rubble over the Rubble*” debate between Steve De’ak, Joe Olson and Jim Fetzer on 2<sup>nd</sup> April 2019 at Revisionmedia.org, Hollywood was already remaking their Godzilla (2014) movie to personify how the monster characters relate to human characters in real-life.

## Here is the draft (parody?) remake of the original movie script:

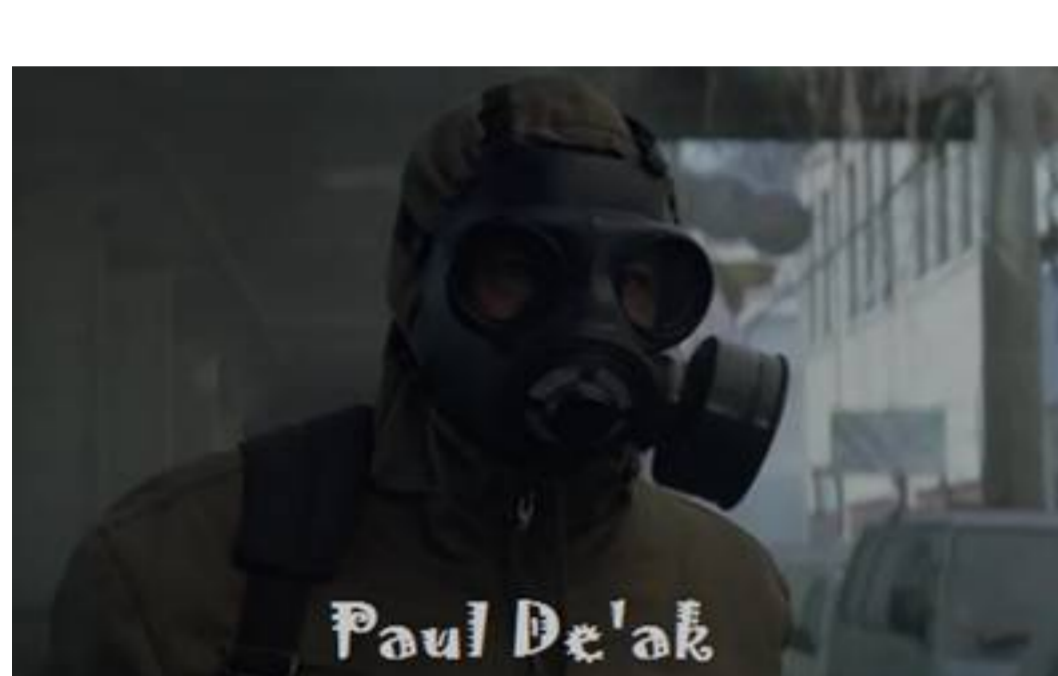

During the alleged U.S. military nuke missile tests in America, Paul De’ak (Uncle to Steve De’ak) finally realises that nukes are fake - when he is told by his superior army officers that the nuke radiation of a bomb (that they had just witnessed go off), was nothing to worry about really, because the radiation was being carried away by the wind in another direction away from them!

Paul De’ak suspects that nukes are all just part of a fake military psy-op. He discovers that after WW2, the Nazis were secretly flown to America under the code-name “Project Paperclip”. In America, they were allowed to continue with their barbaric MK-Ultra mind-control experiments against “We the People”, particularly their *Monarch Mind Control* methods to favour the ‘superior/favoured’ race, or their Darwinian “survival of the fittest” propaganda.

Nazi scientists created the fake atom bomb psy-op to keep We the People in perpetual fear. The leading scientist who invented the atom bomb boasted: “Now I’ve become death”. We the People must now pay high taxes to keep the “nukes are real” myth alive. The Military-Industrial complex uses the money robbed from the brainwashed people to pay for military black ops, and nuclear experiments at CERN.

Paul De’ak tells Steve De’ak that they can’t keep running away from the truth - that nukes aren’t really real, especially as “the cat’s out the bag now”! He tells him: “You can’t bury it in the past forever; we must now face the truth. Nuclear weapons just aren’t real!!”

Nuke experiments were always free from radioactive material and were harmless. Paul and Steve De’ak travel by boat to a nuke quarantine zone. When they arrive, Paul utters in astonishment: “The radiation in this place should be lethal, but there’s nothing!” They find that the air is indeed safe to breathe, and all animals are thriving. They then begin to sing praises to Simon Shack (a “September Clues” 9/11 truther, and a fellow “nukes are fake” advocate). However, they curse the day that they had ever listened to the 9/11 nuke theory proponents at “Veterans Today”- such as Dr. Jim Fetzer, Gordon Duff, Joe Olson, Don Fox, and Dennis Cimino.

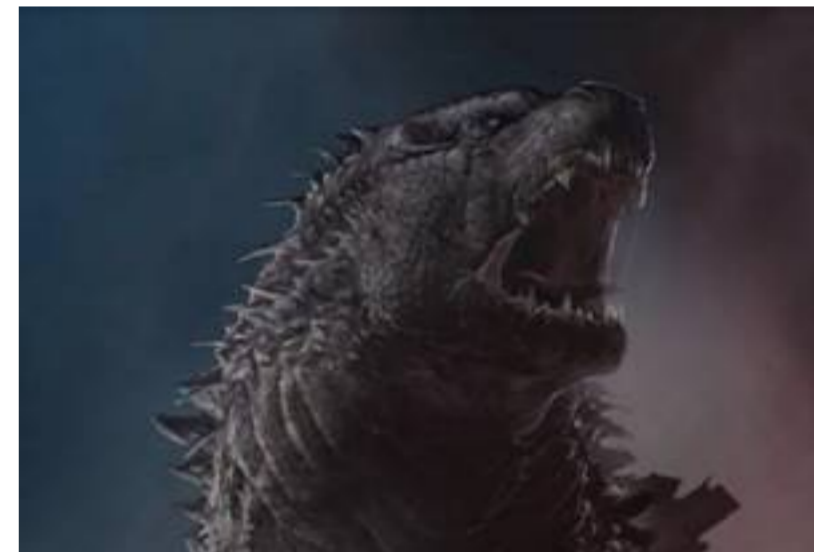

The nuke theory advocates at “Veterans Today” are none other than the personification of “Massive Unidentified Terrestrial Organisms” - M.U.T.O.s (the UFO of monsters!).

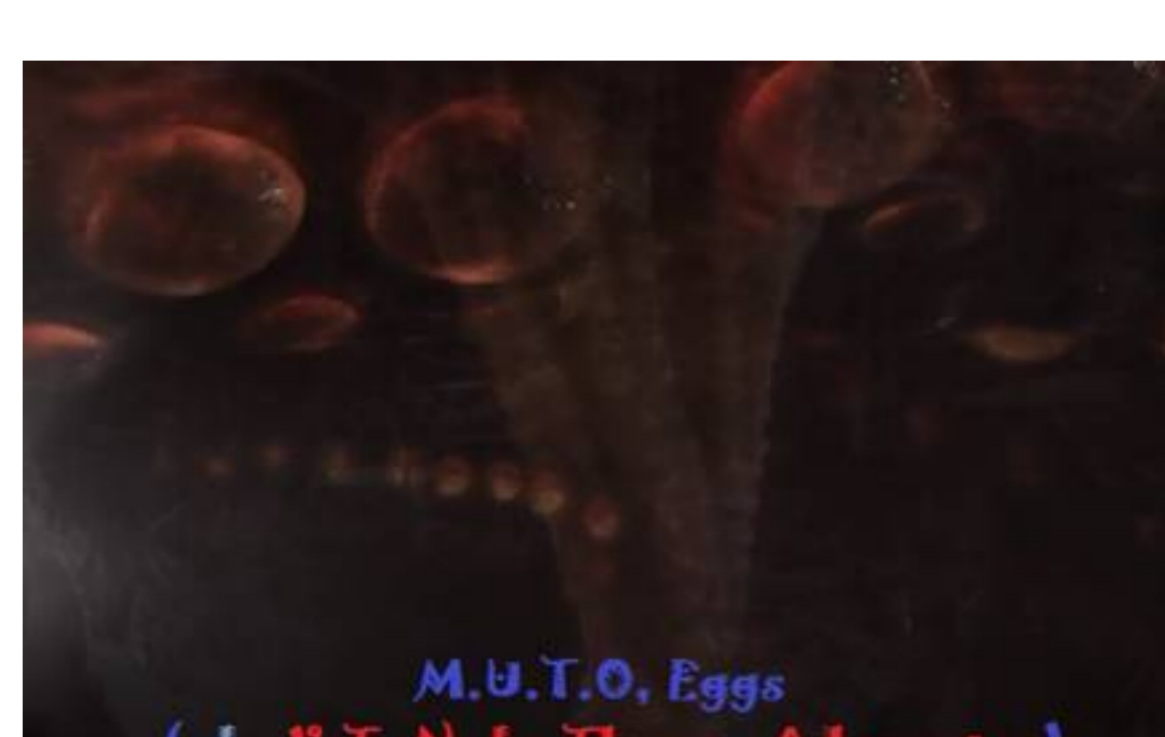

Gordon Duff (V.T. Editor) goes on the Pete Santilli radio show to confess that extraterrestrials control the world, and their 9/11 false-flag technology was a type of Dr. Judy Wood “Directed Energy Weapon” (DEW) - from beyond time and space. We the People finally realise that V.T. nuke advocates are (at best) parasitic terrestrial organisms, if not the more disgusting ET scum of the universe - because they constantly contradict themselves all the time. For example, they can never decide on how the original data for their 9/11 nuke theory ever came about, i.e. was it initially via Edward Snowden, or the Russian Navy, the CIA, or the FBI? But what does it matter anyway now that everyone knows that nukes are indeed totally fake?!

We the People realise that Steve De’ak is the “grandpa of all monsters” in the eyes of the Military-Industrial complex – because he dares to openly challenge their “nukes are real” myth, in a world where truth has become the enemy of the state. Steve De’ak is thus now known by his new name:

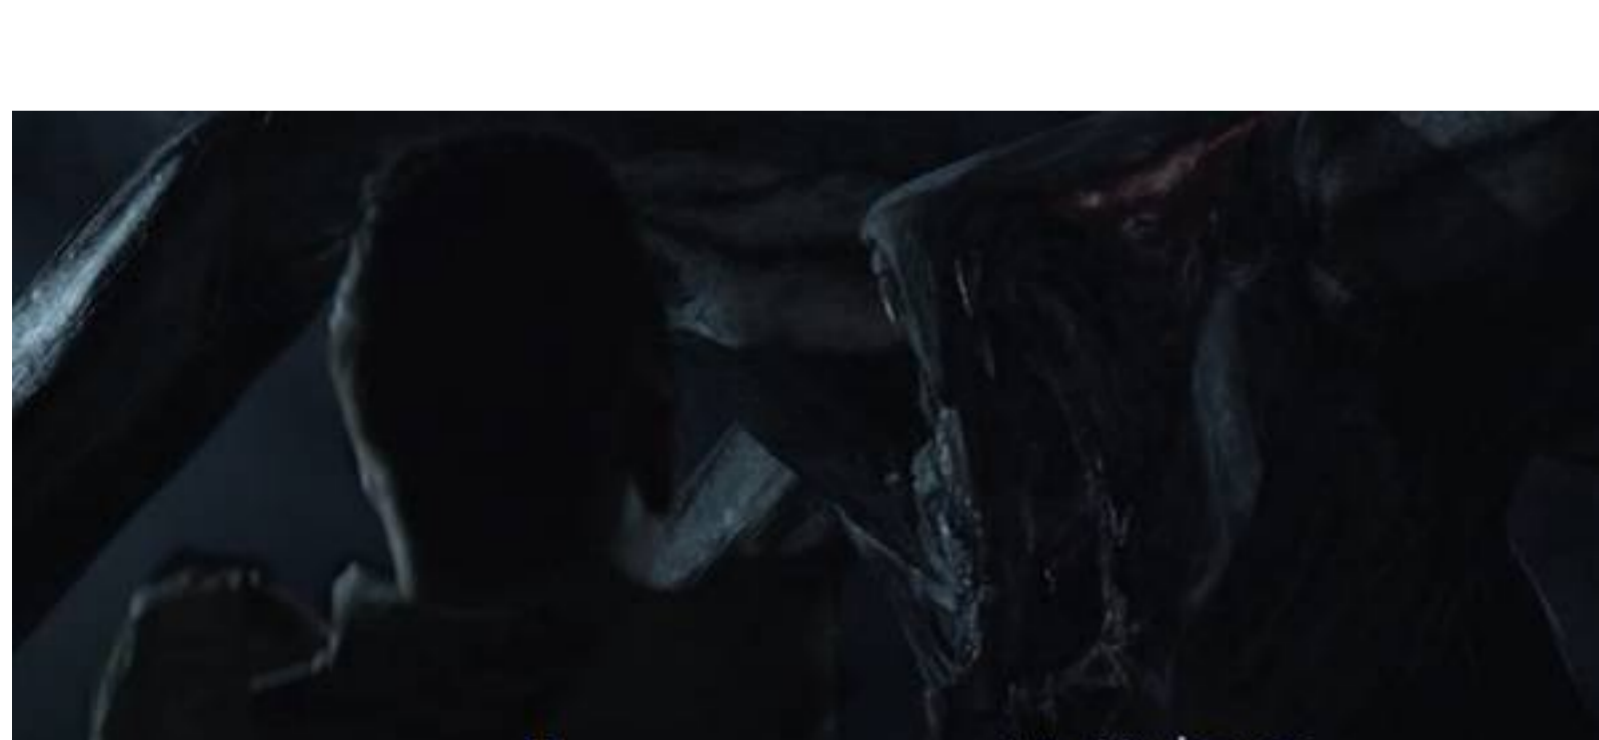

**Godzilla.**

The M.U.T.O.s have evolved as parasites of Godzilla and his species. M.U.T.O.s (aka V.T. nuke theory advocates) need this fake nuke “radioactive” carcass psy-op, and so they lay their eggs in it. That’s how they reproduce the fake “war on terror” and the lifecycle of perpetual fear continues to take place amongst We the People.

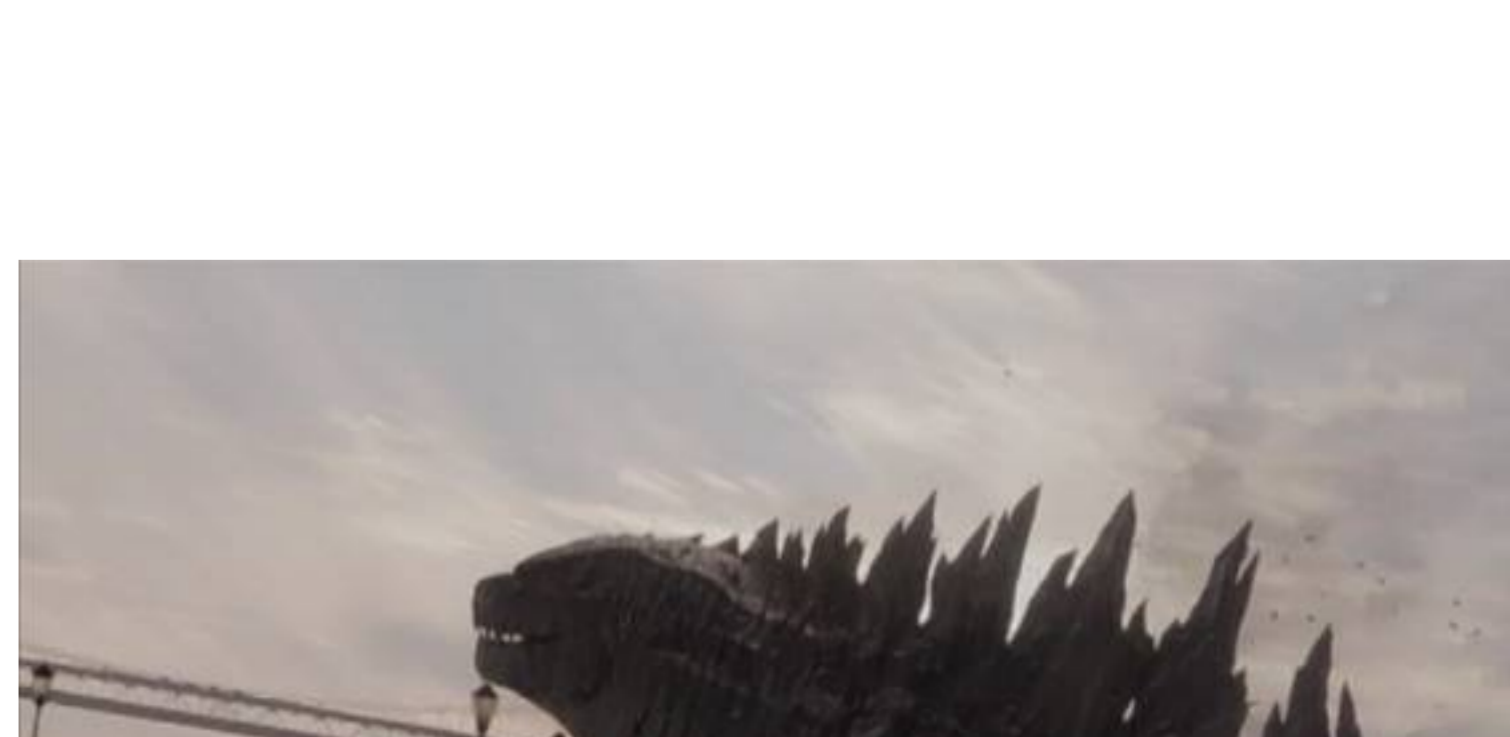

**Steve De’ak (aka Godzilla) states:** “After many millions of years of evolving into the modern age, it felt good to the M.U.T.O.s that in a modern world there’s no real radioactive carcass, but there’s fake nuke radiation everywhere - where we’ve allegedly hoarded and collected it, and as a result when they (the M.U.T.O.s) are left to live in a brainwashed world, they end up being attracted towards nuclear power stations, nuclear missiles, or endless V.T. 9/11 nuke theory fake news articles, and they gather at every phony nuke location - via their innate echo location abilities.”

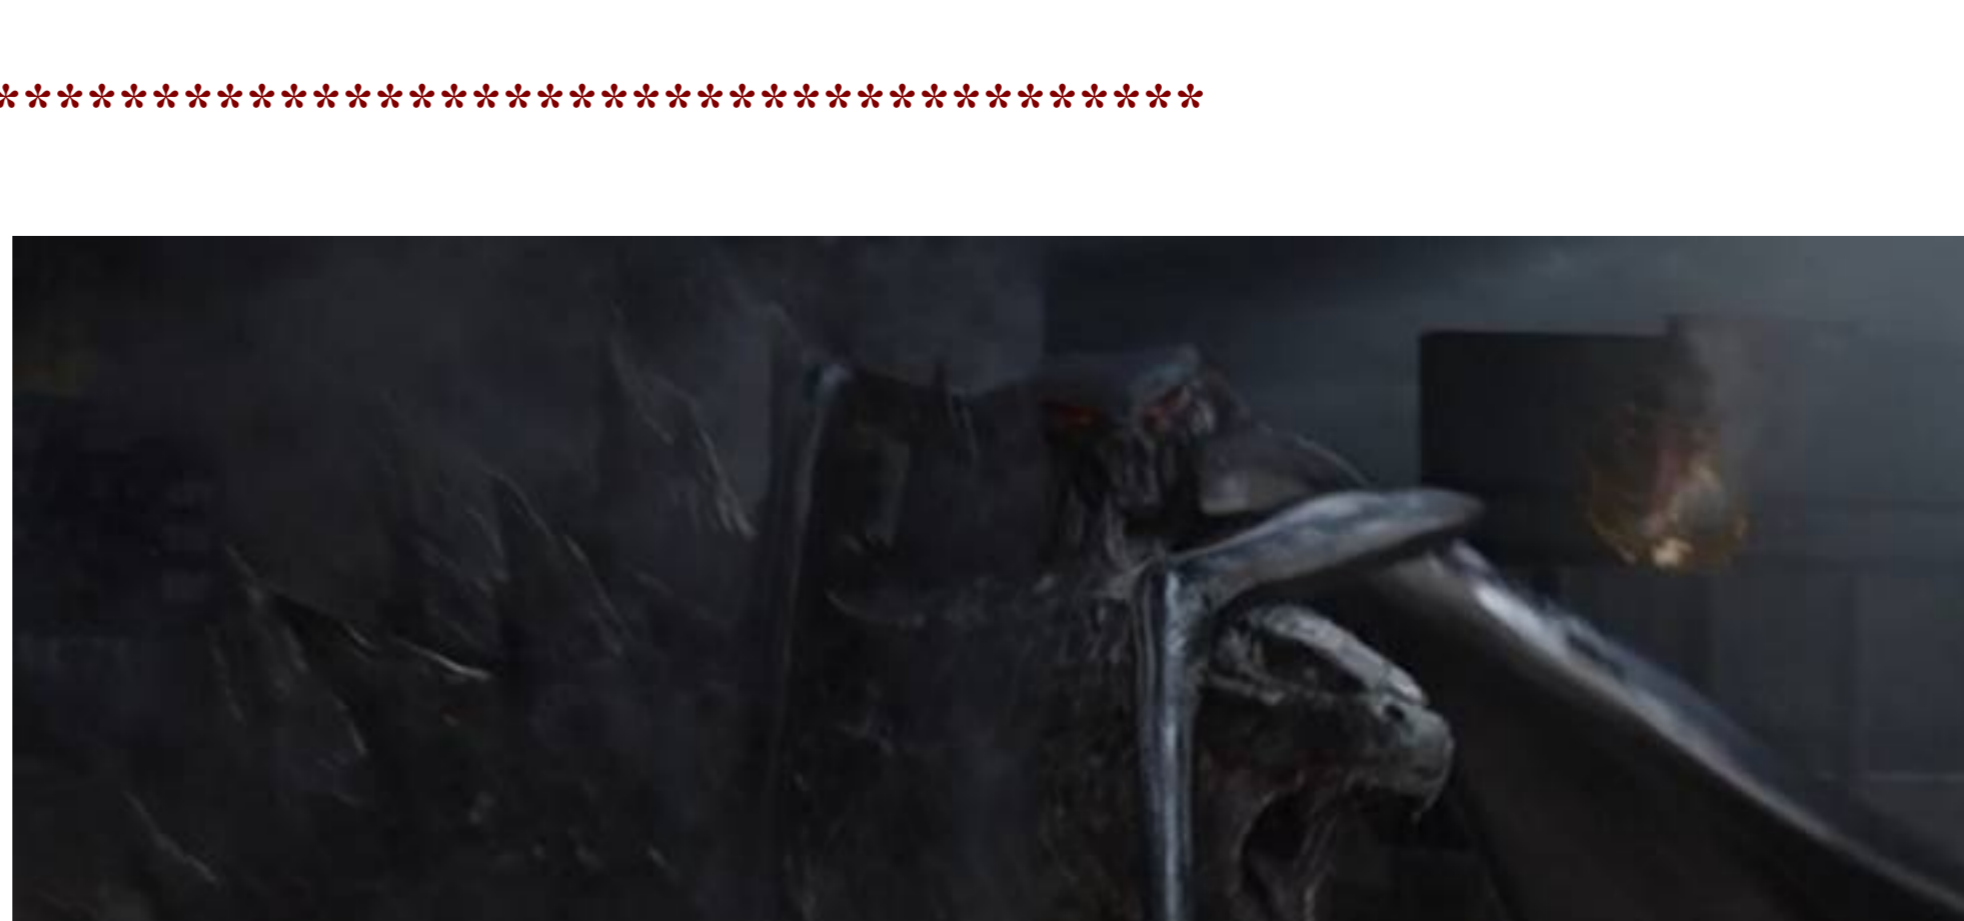

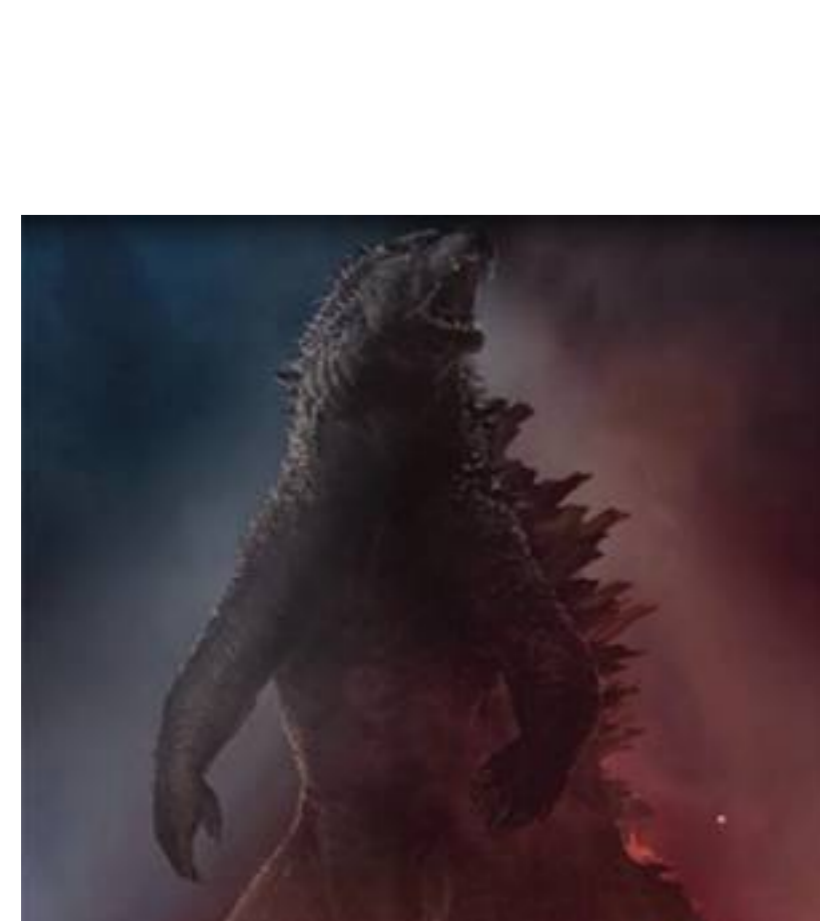

## A Revisionmedia.org radio host stated:

“M.U.T.O.s are the ultimate nemesis for Godzilla. During the recent “*Rumble over the Rubble*”, or Godzilla vs. M.U.T.O.s fight, if it was one-on-one it felt like Godzilla should win, 2 on 1 goes to not playing fair as one might. It’s going to lead to a cage match. It’s gonna be a bloodbath! When they’re together, the M.U.T.O.s are incredibly strong. They’re huge in-and-together, the M.U.T.O.s are giant 400 foot parasites. Terrifying, they’re like the stuff of nightmares! We humans are like flies to them. It’s nature coming back to punish us for the way we’ve treated the world. There’s a twist in the story; where Godzilla is more our hero than he is the villain. He destroys the M.U.T.O.s, and then just wanders back into the water, so he ends up saving the world in a way.”

## Steve De’ak saves the world as Godzilla!
